

### Materials Needed for SandScapes™ Finishing:

- illusions® 9" Specialty Roller with Spatter Guard and paint tray
- low-tack painter's tape
- 2" and 3" latex paint brush
- drop cloth
- illusions® SandScapes™
- illusions® 4" Specialty Edge Roller with Spatter Guard

### Preparation:

A clean, dry, dull surface is optimal for painting. Wash your walls with mild soap and rinse thoroughly. Scrape any loose paint, patch any holes, and sand smooth. Remove dust with a vacuum or tack cloth.

### STEP 1

Mask ceilings, baseboards, and trim with painter's tape. With a brush, cut in an 18" section along the edge of the ceiling and wall with illusions® SandScapes™ finish. Then roll on a thick layer of SandScapes™, filling in an 18" x 18" section.

### STEP 2

As soon as you complete an 18" floor-to-ceiling column, roll over it lightly with a thin layer of SandScapes™. Repeat steps 1 and 2 until you've covered the entire room, overlapping each section to maintain a wet edge. Allow this first coat to dry at least four hours. This first coat will appear uneven when dry.

### STEP 3

Roll on a SandScapes™ topcoat using the same method you used for the first coat. Allow to dry at least 24 hours.

**WARNING!** Removal of old paint by sanding, scraping, or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH-approved) and proper containment and cleanup.

For more information, call the National Lead Information Center at 1-800-424-LEAD (in U.S.) or contact your local health authority.
